## CAREER OBJECTIVE

Frontend-focused Computer Science undergraduate with hands-on experience building AI-integrated web applications using HTML, CSS JavaScript And React.js. Seeking an opportunity where I can learn and contribute to scalable product development while growing through structured practices.

## EDUCATION

**Bachelor of Computer Applications (BCA)** - Reva university, Bangalore, India (2024-2027)  
**Class XII** -St. John's Vestry Anglo Indian Higer secondary school, Tamil Nadu, India (2024)  
**Class X** -Sri Saratha Vidyalaya Matric School, Tamil Nadu, India (2022)

## TECHNICAL SKILLS

**Frontend:** HTML5, CSS3, JavaScript (intermediate), React.js (Basic), Bootstrap (Basic), Responsive Design.

**Tools & Platforms:** Git (Basic), GitHub, VS Code, GitHub Pages.

**Concepts:** Data Structures (Java), REST API Integration, AI API Consumption, localStorage.

**Currently Learning:** Node.js, Express.js, MongoDB (MERN Stack), Vite, Python.

## PROJECTS

**AI-Powered Loan Eligibility Predictor** *React.js · JavaScript · Vite · GitHub Pages*

- Built a React.js web app with a custom AI scoring engine that evaluates loan eligibility across 5 weighted parameters (Credit Score, Income, Employment Type, Age, Loan Purpose), returning real-time approval decisions with confidence percentages.
- Built an integrated EMI Calculator at 8.5% interest rate with animated result cards displaying approval/rejection reasons, improving decision transparency for end users.
- Deployed to GitHub Pages with a production-grade fintech UI (black-and-red design system), demonstrating end-to-end ownership from development to live deployment.

**CashCrafter Personal Finance Management App** *JavaScript · HTML · CSS · localStorage API*

- Developed a fully client-side expense and budget tracking application with basic frontend languages
- Implemented dynamic budget vs. expense comparison with real-time UI updates and a responsive layout compatible across mobile and desktop viewports.
- Designed a user-friendly dashboard that enables users to categorize spending, track monthly limits, and visualize cash flow, solving a real-world personal finance gap.

**Personal Portfolio Website** *HTML · CSS · JavaScript*

- Developed a personal portfolio website with Home, About, Projects, and Resume sections, including a downloadable resume feature.
- Built the entire website using HTML, CSS, and JavaScript.
- Deployed it on GitHub Pages and ensured it is live and accessible.

## CERTIFICATIONS

- Coursera:** Front-End Web Development
- Infosys Springboard:** Python Object-Oriented Programming
- Mevi Technologies:** HTML, CSS & JavaScript for Web Developers

## ACHIEVEMENTS & ADDITIONAL INFO

- Deployed 1 live web applications on GitHub Pages, demonstrating real-world delivery capability beyond academic submissions.
- Built and integrated an AI-based decision engine in a frontend React app without using third-party ML libraries, showcasing applied problem-solving skills.

**Languages:** English, Tamil, Kannada.
